Ayon Spirit III

Ayon is pleased to introduce the all new Spirit III, a substantial advancement of our already highly regarded "Spirit II" model offering. The Spirit III is not a simple update; it is a new re-design featuring new circuit boards, automatic bias, bigger power transformer and increased the power supply energy storage two times. The Spirit III is a "superb value" and powerful pentode-triode vacuum tube stereo integrated amplifier. It's fast, airy, dynamic, punchy and controlled bass, clear and holographic soundstage is already a standard in this amplifier.
