Ayon Triton III

We are proud to introduce our latest third-generation integrated amplifier, the Triton III. This design presents a substantial upgrade to our very popular Triton II stereo integrated amplifiers, highly-regarded for providing world class performance in a beautiful-engineered, compact, and elegant package. All the gain stages have been re-designed and optimized as well to provide for the shortest signal path and the most direct signal flow. The result is a significant advance in sonic performance, wider and deeper airy soundstage with greatly improved powerful bass punch and dynamics. Musical finesse and superb powerful performance has been combined without compromise into one convenient chassis and affordable pricing. Compared with many top grade integrated amplifiers, the Triton III is a mid-priced unit, but we are confident that value and musical performance is approached maybe by few KT88
