## Ayon Polaris III

The new Polaris III is one of the finest tube preamplifier made, regardless of price. It is a marvel of engineering with its unique C3m tube circuit design, a new revolutionary volume control system and construction. This tube preamplifier presents a new level of musical performance, 3D airy sound and construction quality among mid-priced vacuum tube preamps. It combines exceptional design and outstanding engineering, highest quality parts, best selected material and a never ending love for music. The external Polaris III AC~ Regenerator offers stable, regulated and purified AC power regardless of the incoming AC line quality. This power supply provides a lowered noise floor, more liquidity, better spatial three-dimensional imaging, greater focus, richer colours, and decreased glare & haze.
